SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT (37 C.F.R. § 1.97(b))

Mail Stop RCE Commissioner for Patents P.O. Box 1450 Alexandria, Virginia 22313-1450

Dear Sir:

With regard to the above-identified application, the items of information listed on the enclosed Form 1449 are brought to the attention of the Examiner.

This statement should be considered because it is submitted before the mailing of a first Office Action after the filing of a Request for Continued Examination under 37 C.F.R. § 1.114. Accordingly, no fee is due for consideration of the items listed on the enclosed Form 1449.

A copy of any foreign patent document or "Other Document" listed on the Form 1449 is enclosed, in accordance with 37 C.F.R. §1.98(a)(2). Because this application was filed after June 30, 2003, copies of the U.S. Patents and U.S. patent publications listed on the enclosed Form 1449 are not provided.

Many of the documents or information cited on the Form 1449 have been previously cited in one of this family's related applications, and are being cited on this Form 1449 pursuant to MPEP § 609.02(A)(2). Specifically, MPEP § 609.02(A)(2) provides that the Examiner will consider information that has been considered by the Office in a parent application when examining a continuation application, and a listing of the information need not be resubmitted unless the applicant desires the information to be printed on the patent. Applicant desires the information to be printed on the patent, in this case. Certain of the documents listed on the Form 1449 have been cited in connection with the reexamination of the patents that are related to the present application and are being cited in this application and in this family of applications for the first time. These are the following:

- US D34,284 Jacquart
- US D201,966 Frese
- US 786,272 Dow
- US 804,240 Libby
- US 811,534 Akers et al.
- US 4,196,161 Toffolon et al.
- US 4,920,712 Dean, Jr.
- PCT WO 94/08097 Guth
- Petition documents filed August 11, 2004 to correct inventorship in US Pat.
 6,113,318
- Petition documents filed August 11, 2004 to correct inventorship in US Pat.
 5,797,105
- Office Action, mailed June 13, 2005 in Reexamination of U.S. Patent No. 6,641,334, Control No. 95/000,056
- Patent Owner's Response Under 37 C.F.R. 1.945 and supporting documents, filed August 15, 2005 in Reexamination of U.S. Patent No. 6,641,334, Control No. 95/000,056
- Comments of 3rd Party Requester On The First Office Action and Patent Owner's Response and supporting documents, filed September 14, 2005 in Reexamination of U.S. Patent No. 6,641,334, Control No. 95/000,056

The Examiner's attention is directed to the following related matters:

• There are seven pending reexaminations involving patents in the same family of applications as this pending application. These reexaminations have been listed by Control Number on the Form 1449 submitted in this application on March 22, 2005. The reexaminations are:

| Reexam Control No. | Patent No. | Date Reexam Ordered |
|--------------------|------------|---------------------|
| 90/007,249 | 5,795,105 | December 16, 2004 |
| 90/007,240 | 6,113,318 | December 16, 2004 |
| 95/000,056 | 6,641,334 | December 16, 2004 |
| 90/007,234 | 5,490,363 | November 15, 2004 |
| 90/007,250 | 5,704,183 | December 16, 2004 |
| 90/007,239 | 5,711,129 | December 16, 2004 |
| 90/007,238 | 5,709,062 | December 16, 2004 |

- In Reexamination 95/000,056, a non-final Office Action rejecting the claims of US Pat. 6,641,334 was mailed on June 13, 2005. The June 13, 2005 office action, the Patent Owner's response filed August 15, 2005, and the Third Party Requestor's response filed September 14, 2005 have been listed on the accompanying 1449 and copies are submitted herewith.
- One of the issues raised in the Office Action for Reexamination Control No. 95/000,056 is whether U.S. Patent No. 6,641,334 is entitled to the benefit of priority of the filing date of the original applications filed in 1992-1993 due to the failure of some of the applications in the chain to identify a common inventor. The patent owner and assignee for this application, Anchor Wall Systems, Inc., filed petitions on August 11, 2005 to correct an error in inventive entity for U.S. Patent No. 5,795,105 and U.S. Patent No. 6,113,318 and make clear that each application in the chain shares a common inventor. Included in the Information Disclosure Statement materials and listed on the accompanying Form 1449 is a copy of the papers filed on August 11, 2005 to correct inventorship in U.S. Patent No. 5,795,105 and U.S. Patent No. 6,113,318. There has been no decision yet from the Patent Office regarding these petitions to correct inventive entity. The

petitions to correct inventive entity in the '105 patent and in the '318 patent will obviate all of the rejections in the June 13, 2005 Office Action in Reexamination Control No. 95/000,056 that are based on various combinations that include the Guth '105 patent and the PCT Publication WO 94/08097.

If the Examiner has any questions or would like further information or copies of documents, the Examiner is invited to telephone the undersigned at the below listed telephone number.

Consideration of the items listed is respectfully requested. Pursuant to the provisions of M.P.E.P. 609, it is requested that the Examiner return a copy of the attached Form 1449, marked as being considered and initialed by the Examiner, to the undersigned with the next official communication.

No representation is made that a reference is "prior art" within the meaning of 35 U.S.C. §§ 102 and 103 and Applicants reserve the right, pursuant to 37 C.F.R. § 1.131 or otherwise, to establish that the reference(s) are not "prior art." Moreover, Applicants do not represent that a reference has been thoroughly reviewed or that any relevance of any portion of a reference is intended.

Please charge any additional fees or credit any overpayment to Deposit Account No. 13-2725.

Respectfully submitted, MERCHANT & GOULD P.C.
